

Layer Secrets

圖層的秘密

iPad Digital Art · Session 2

What is a Layer? 什麼是圖層？

Think of layers like sheets of transparent glass stacked on top of each other.

像一層一層疊在一起的透明玻璃板！

Animation 動畫

Old cartoons were drawn on separate transparent sheets called 'cels'. Each character was on a different layer — just like digital layers today!

Maps 地圖

Google Maps uses layers too — roads on one layer, buildings on another, traffic on another. Turn any layer on or off!

Pizza 披薩

Base → sauce → cheese → toppings. Each is a 'layer'. Remove the cheese layer and you still have the rest! 移掉起司層，其他還在！

Clothing 衣服

T-shirt → jacket → coat. Each item is a layer. You can take off the jacket without removing everything else! 分層穿搭！

Why Use Layers? 為什麼要用圖層？

Layers give you CONTROL — edit one part without touching the rest! 圖層讓你有控制權！

1

Edit freely 自由修改

Made a mistake on the background? Just select that layer and fix it — your character on another layer is safe! 只改你要改的那層！

2

Show or hide 顯示或隱藏

Click the eye icon  to hide a layer instantly. Want to see how it looks without the text? One click! 一鍵隱藏任何圖層！

3

Reorder easily 輕鬆排序

Drag layers up and down to change what appears in front or behind. Put your character in front of the background! 拖曳調整前後順序！

4

Different effects 不同效果

Each layer can have its own opacity 透明度, blend mode 混合模式, and effects — without affecting other layers!

5

Non-destructive 非破壞性編輯

Working in layers means you never permanently destroy your original artwork. You can always go back! 永遠可以回到原來的樣子！

6

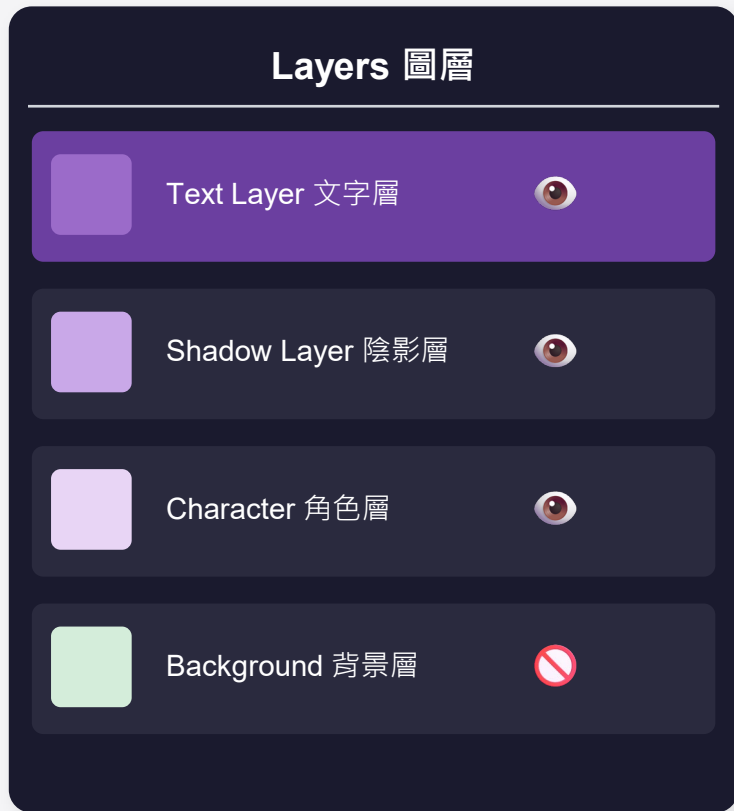

Work faster 工作更快

Professional designers use dozens of layers. It seems complex but actually makes everything faster and more organised! 專業設計師都用圖層！

The Layers Panel 圖層面板介紹

In Procreate 在 Procreate 裡：tap the layers icon 點圖層圖示 → Layers panel opens!

Visibility eye 可見度眼睛

Tap to show or hide a layer. The layer still exists — it's just invisible! 點擊顯示或隱藏圖層

Active layer 當前圖層

The highlighted layer is where you're drawing. Always check which layer is active before you paint! 永遠確認你在哪個圖層！

Layer thumbnail 縮圖

The small preview shows what's on that layer. Tap and hold to see a bigger preview! 顯示該層的內容

Add new layer 新增圖層

Tap + to add a new blank layer on top. Always add a new layer before drawing something new! 畫新東西前先新增圖層！

Common Mistakes 常見錯誤

Every beginner makes these! 每個初學者都犯過這些錯誤！ Learn them now → save yourself later!

✗ **Drawing on the wrong layer** 畫在錯誤的圖層

✓ Always check the active layer before drawing. If something looks wrong, check your layers panel first! 先看圖層面板！

✗ **Everything on one layer** 所有東西在同一層

✓ Use a new layer for each element — background, character, text. Mixing everything makes it impossible to edit later!

✗ **Hidden layer confusion** 被隱藏的圖層讓人困惑

✓ If your drawing seems to disappear, check the 👁️ — you may have accidentally hidden a layer! 檢查可見度！

✗ **Deleting instead of hiding** 刪除而不是隱藏

✓ Before you delete a layer, try hiding it first. You might need it later! 先隱藏再說，不要急著刪！

Pro tip: Name your layers! Double-tap a layer name to rename it. Future you will be very grateful! 幫圖層命名！

Your Turn! 換你了！

Layer Challenge 圖層挑戰

Open Procreate → New canvas 新畫布 → Start!

1

Create 3 layers 建立3個圖層

Layer 1: Draw a simple background colour
Layer 2: Draw a simple shape (circle or square)
Layer 3: Write your name

2

Hide & show 隱藏與顯示

Tap the  on each layer one by one.
Watch what happens to your drawing!
哪個消失了？說給旁邊的人聽！

3

Reorder layers 調整圖層順序

Drag Layer 2 below Layer 1.
What changed? What went behind the background?
拖曳看看會發生什麼事！

4

Name your layers 幫圖層命名

Double-tap each layer name and rename:
'Background' · 'My Shape' · 'My Name'
讓你的圖層整齊有條理！
