

Behind the Scenes

博物館幕後大揭秘

Who keeps a museum running? 誰讓博物館運轉？

What You See vs. What's Hidden 你看到的 vs. 背後的

What Visitors See

- ✦ Beautiful exhibitions 精美的展覽
- ✦ Artifacts in glass cases 玻璃櫃裡的文物
- ✦ Information labels 說明牌
- ✦ Gift shops & cafes 紀念品店
- ✦ Security guards 保全

What's Hidden Behind

- ✦ Storage vaults 地下收藏庫
- ✦ Conservation labs 文物修復實驗室
- ✦ Research offices 研究室
- ✦ Climate control systems 溫控系統
- ✦ Loading docks for new arrivals 文物進出通道

For every 1 person you see working, there are 10 more working behind the scenes!

The Curator 策展人

The brain of the museum

Real example:

The Met has over 400 curators — one for Egyptian art, one for modern art, one for armour!

Research artifacts

Study where each object came from, who made it, and what it meant to people.

Design exhibitions

Decide which objects to show, how to arrange them, and what story to tell.

Write labels

Every information card in a museum was written by a curator — short but packed with facts!

Borrow from other museums

Curators negotiate to borrow special objects from museums around the world for temporary shows.

If you were a curator, which type of art would you specialise in?

The Conservator 修復師

The doctor of the museum — they heal sick artifacts!

They use science!

Conservators use X-rays, microscopes, and chemical analysis to understand what an artifact is made of before touching it.

They paint... very carefully

Some conservators spend months painting individual brushstrokes to restore a damaged painting — one tiny area at a time.

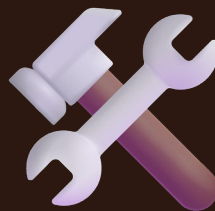

It takes forever

Restoring one large painting can take 2-3 YEARS. Patience is the most important skill!

Famous example

In 2012, a conservator in Spain famously restored a painting of Jesus — but got it very wrong! It became world news. 馬賽克耶穌事件！

Tools of the Trade 修復師的工具

Microscope 顯微鏡

Micro-syringes 微量注射器

Ultra-fine brushes 超細畫筆

UV lamps 紫外線燈

Chemical solvents 化學溶劑

More Amazing Museum Jobs! 更多博物館職人！

A museum needs many different experts to run — here are a few more!

Museum Photographer 文物攝影師

Every object must be photographed perfectly before it's stored or displayed. The British Museum has photographed all 8 million objects!

Art Handler 文物搬運師

Specialised movers who know exactly how to pack, carry, and transport priceless artifacts — without dropping them! They use custom crates and climate-controlled trucks.

Exhibition Designer 展覽設計師

Creates the look and feel of exhibitions — the lighting, the layout, the colours. Think of it like designing a stage set!

Museum Educator 博物館教育員

Designs programmes for schools and visitors. They turn complicated history into fun activities — a bit like what your teacher does!

Security Specialist 安全專家

The Louvre has 1,300 security staff. They use lasers, cameras, and pressure sensors to protect priceless works — 24 hours a day!

Digital Curator 數位策展人

A new role! They put museum collections online, create virtual tours, and help people visit museums from anywhere in the world.

A Day in the Life of a Curator 策展人的一天

At the Metropolitan Museum of Art, New York 紐約大都會藝術博物館

8:30 AM

Morning briefing

Meet with the team. A new Egyptian artifact arrived from Cairo last night — check its condition!

10:00 AM

Lab visit

Visit the conservation lab to check on a Greek vase being restored. It's been there for 8 months.

12:30 PM

Call with Paris

Negotiate with the Louvre — can we borrow their Vermeer painting for next year's exhibition?

2:00 PM

Write label text

Write the information cards for 12 new objects going on display next month. 50 words each — sounds easy, but it's not!

4:00 PM

Gallery walk

Walk through the galleries, check everything looks right, answer visitor questions.

5:30 PM

Research time

Read new academic papers about Roman jewellery for the upcoming exhibition. Never stop learning!

How Do Museums Get Their Objects? 博物館怎麼得到文物？ 🤔

It's more complicated than you think — and sometimes controversial!

Donations 捐贈

Rich collectors donate their personal collections. Many museum wings are named after donors!

Purchase 購買

Museums buy objects at auctions or from private sellers. A single painting can cost hundreds of millions!

Archaeological digs 考古發掘

Museums fund excavations to discover new artifacts. Scientists carefully unearth and study them.

Long-term loans 長期借展

Some objects are borrowed from other museums or governments for years at a time.

Historical acquisition 歷史取得

Many objects in old museums were collected during colonial times — this is now controversial. Some countries want their objects back! 文物歸還爭議

Which job is for YOU? 你最適合哪個職位？

Love history & research?

→ **Curator** 策展人

Love art & science
combined?

→ **Conservator** 修復師

Love photography &
detail?

→ **Museum
Photographer** 攝影師

Love design & creativity?

→ **Exhibition
Designer** 展覽設計師

Love teaching & kids?

→ **Museum
Educator** 教育員

Love tech & the internet?

→ **Digital Curator**
