

自來水博物館

Water Resources Museum

Before Our Visit 參觀前預習

Where Does Water Come From? 水從哪裡來？

Water moves in a never-ending cycle — it never disappears, just changes form!

1

Evaporation 蒸發

The sun heats up water in rivers, lakes, and oceans. The water turns into water vapour and rises into the sky.

2

Condensation & Rain 凝結與降雨

Water vapour cools high in the sky, forms clouds, and falls back down as rain or snow.

3

Collection 匯集

Rain flows into rivers, lakes, and underground reservoirs 水庫. This is the water we eventually drink!

4

Treatment & Use 淨化與使用

Humans clean the water and pipe it to our homes. After use, it goes back to rivers and starts again!

Can you think of where the water in your bottle started its journey?

The Journey of Tap Water 自來水的旅程

From the river to your tap — a long and important journey!

1

Source 水源

Rain & snow collect in rivers and reservoirs 水庫 in the mountains.

2

Pumping Station 抽水站

Big pumps pull the raw water 原水 from the river and push it to the treatment plant.

3

Treatment Plant 淨水廠

Water is filtered, cleaned with chemicals, and tested to make sure it's safe to drink.

4

Water Tower 水塔

Clean water is stored in high towers so gravity can push it through pipes to our homes.

5

Your Home! 你家 !

Turn on the tap — clean, safe water comes out instantly! 打開水龍頭就有水 !

How many steps does water go through before you drink it?

Meet the Water Resources Museum! 認識自來水博物館 🏛️

自來水博物館

Water Resources Museum

📍 Zhongzheng District, Taipei

Built: 1908 (over 100 years old!)

Style: British Baroque Architecture
英國巴洛克建築風格

Originally a real working pumping station
原本是真正的抽水站！

Heritage Building 古蹟

It's a Grade 2 national historic site 二級古蹟 —
one of the most beautiful old buildings in Taipei!

Real Machines Inside!

The original steam-powered pumping machines
are still inside. They were built in England and
shipped here!

Beautiful Garden 美麗庭園

Why do you think they built a pumping station to
look like a palace?

What Will We See? 我們會看到什麼？

Here are the highlights you'll find inside the museum!

Historic Pumping Machines 古老抽水機

Massive steam-powered machines from 1908, still standing inside the main hall.
Taller than your teacher!

Baroque Architecture 巴洛克建築

Beautiful columns, arches, and red brick walls — it looks more like a palace than a water station!

Water Treatment Display 淨水展示

Interactive displays showing how dirty river water becomes clean drinking water, step by step.

History of Taipei's Water 台北供水歷史

Learn how Taipei got its water supply 120 years ago — and how it's changed since then.

Outdoor Garden 戶外庭院

Explore the peaceful garden surrounding the museum, with old trees and historic structures.

Science Lab Zone 科學體驗區

Hands-on activities about water science — you might get to experiment with filtering and testing water!

Your Visit Mission! 參觀任務卡

Keep these missions in mind when we visit — be a curious explorer!

1

Spot the machines

Find the big old pumping machines. How tall do you think they are? Guess!

2

Count the columns

How many columns can you find on the outside of the building? Look carefully!

3

Trace the water journey

Can you find all 5 steps of the water journey displayed in the museum?

4

Oldest tree

Walk around the garden — which tree looks the oldest? How old do you think it is?

5

Ask one question

Think of ONE question to ask the guide or teacher during the visit. Write it below!

6

Find your favourite

Decide what YOUR favourite thing in the museum is. You'll share it after the visit!

Let's Think & Talk! 想一想，說一說！

1

How many litres of water do you think you use every day? 你每天用幾公升的水？

2

What would happen if we ran out of clean water? 如果沒有乾淨的水會怎樣？

3

Why is it important to save water? 為什麼要節約用水？

4

What are 3 ways you could use LESS water at home? 你在家裡可以怎麼節省水？

See you at the museum on July 21! 七月二十一日見！💧
