

Master the Lasso

套索選取術

iPad Digital Art · Session 5

Select anything. Move everything.
選取任何東西，移動一切！

What is the Lasso Tool? 套索工具是什麼？

The lasso lets you **SELECT** any part of your drawing — then do things to **JUST** that part!

套索讓你選取畫作的任何部分，然後只對那個部分做修改！

Select a region 選取一個區域

Draw around any area of your artwork. Everything **INSIDE** your selection can be edited separately from the rest.

Like a magic scissors 像魔法剪刀

Think of it as cutting out a piece of paper — but digitally! The rest of your drawing stays safe and untouched.

Works on one layer 在單一圖層上使用

The lasso selects pixels on the **ACTIVE** layer only. Make sure you're on the right layer before selecting! 確認你在正確的圖層！

The most powerful tool 最強大的工具

Professional digital artists use the lasso constantly. Master this and your artwork control goes to a whole new level! 掌握這個工具讓你的創作更自由！

Types of Lasso 套索的種類

In Procreate, there are 3 selection modes. Each works differently! 三種選取模式，各有不同用法！

1

Freehand 自由手繪

Draw ANY shape around your selection

Hold your Apple Pencil and draw freely around the area you want to select. Great for selecting irregular shapes like characters or objects!
用手自由畫出選取範圍，適合不規則形狀！

Best for: organic shapes, characters, complex areas 最適合：有機形狀、角色輪廓

2

Automatic 自動選取

Tap to select areas of similar colour

Tap any area and Procreate automatically selects all pixels of the same colour. Adjust the threshold to select more or less!
點擊即可自動選取同色區域，適合填色後使用！

Best for: flat colour fills, backgrounds, simple shapes 最適合：填色區域、背景

3

Rectangle / Ellipse 矩形/橢圓

Draw perfect geometric selections

Drag to create a perfect rectangle or ellipse selection. Great for selecting specific areas with clean edges!
拖曳即可做出完美的幾何選取範圍！

Best for: cropping, straight-edged selections 最適合：裁切、整齊的選取

After Selecting — What Can You Do? 選取之後能做什麼？

This is where the magic happens! 這裡才是魔法開始的地方！

↔ **Move** 移動

Drag your selection anywhere on the canvas. Perfect for repositioning elements! 把選取的部分拖到任何地方！

Copy & Paste 複製貼上

Copy your selection and paste it as a **NEW LAYER**. Duplicate characters, objects, or patterns easily! 複製成新圖層！

↕ **Transform** 變形

Scale up/down, rotate, flip, or distort your selection. Resize without affecting the rest of your drawing! 縮放、旋轉、翻轉！

Fill with colour 填色

Fill the selection with any colour instantly — like a smart fill bucket that respects your exact selection! 一鍵填滿選取區域！

Delete 刪除

Erase only the selected area, leaving everything else perfectly intact. Precise deletion! 只刪除選取的部分！

Apply effects 套用效果

Add blur, sharpen, or colour adjustments to **ONLY** the selected area. Target specific parts of your artwork! 只對選取的部分套用效果！

These tricks will save you so much time! 這些技巧會為你節省很多時間！

3

Feather the edges 羽化邊緣

Use the Feather slider to soften the edges of your selection. Creates smooth, blended results instead of harsh cuts! 讓邊緣更柔和自然！

2

Remove from selection 從選取範圍移除

Tap 'Remove' to subtract areas from your selection. Selected the wrong part? Fix it without starting over! 選錯了？直接移除不用重來！

5

Snapping 吸附功能

When transforming, hold and the selection snaps to straight angles. Perfect for precise rotation and scaling! 按住讓變形更精準！

6

Save your selection 儲存選取範圍

Complex selections can be saved and reloaded later. Don't lose hours of careful selection work! 複雜的選取範圍可以儲存！

Your Turn! 換你了！

Lasso Challenge 套索挑戰

Open Procreate → open your pixel character from last session → Let's practice!

1 Select your character 選取你的角色

Use Freehand lasso to draw around your whole pixel character.
Zoom in for more precision! 放大後更精準！

2 Move it 移動它

Drag your selection to a different part of the canvas.
See how easy it is to reposition! 拖移到不同的位置！

3 Duplicate it 複製它

Copy → Paste to create a duplicate on a new layer.
Now you have TWO characters! 現在你有兩個角色！

4 Transform one 變形其中一個

Select one copy and scale it smaller.
A big character and a small one — a whole scene! 做出大小不同的角色！
